PROFESSIONAL SUMMARY

Enthusiastic and self-driven Computer Science student with hands-on experience building scalable web applications using React.js, JavaScript, and modern front-end tooling. Strong foundation in data structures, algorithms, and database management. Skilled in writing clean, maintainable code and solving complex algorithmic problems. Eager to contribute to a high-impact engineering team as a Frontend Developer, React.js Developer, or MERN Stack Developer.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), Python, HTML5, CSS3, SQL
- Frontend:** React.js, Redux Toolkit, Tailwind CSS, Responsive Web Design, Single Page Applications (SPA)
- Backend & Database:** Node.js, MySQL, RESTful APIs
- Concepts:** Data Structures and Algorithms, State Management, Component-Based Architecture, Custom Hooks
- Tools and Platforms:** Git, GitHub, VS Code, Postman, Parcel, Prompt Engineering, AI-Assisted Debugging

PROJECTS

FoodStream — Scalable E-Commerce and Food Delivery Platform 2024

React.js, Redux Toolkit, Tailwind CSS, JavaScript, Parcel

- Designed and deployed a high-performance food delivery web application handling real-time data aggregation via public REST APIs.
- Engineered global state management using Redux Toolkit to handle complex asynchronous cart actions (add, remove, persist items) across multiple routes.
- Optimized application performance and bundle size by implementing lazy loading and dynamic imports.
- Built modular, reusable UI layouts using Tailwind CSS, ensuring full responsiveness across mobile, tablet, and desktop viewports.
- Created custom React hooks to isolate business logic from presentation components, ensuring clean and maintainable code architecture.

GitHub: <https://github.com/menil-nxt/NamasteReact>

Domain Flow Simulator — Interactive Web Application 2024

HTML5, CSS3, Vanilla JavaScript

- Built a responsive web application simulating a complete domain purchasing ecosystem and checkout flow.
- Engineered dynamic content updates and real-time form validation using vanilla JavaScript, focusing on raw DOM manipulation without external libraries.
- Ensured a seamless, reload-free user experience by structuring efficient event listeners and local state management.

EDUCATION

Marwadi University, Rajkot, India — BSc. Information Technology 2023 - 2026

School of Science (SOS), Rajkot, India — Higher Secondary Certificate (HSC), Science 2022 - 2023

Mahatma Gandhi School, Rajkot, India — Secondary School Certificate (SSC) 2020 - 2021

LANGUAGES

English, Hindi, Gujarati

ADDITIONAL INFORMATION

- Actively solving algorithmic challenges on LeetCode to strengthen data structures and problem-solving skills.
- Expanding technical expertise into cross-platform mobile development using React Native.
- Interested in emerging technologies at the intersection of software engineering and ethical robotics.
